

♦ Modern, AI-driven ordering for UAE restaurants

WhatsOrder
order · cook · grow

Your whole restaurant runs on WhatsOrder

Turn a QR code into orders and a busy kitchen into a calm one. No app for your customers. No chaos for your team. Just more revenue, fewer mistakes, and regulars who keep coming back.

▲ More revenue

✓ Less chaos

♥ Loyal customers

HOW YOUR CUSTOMER ORDERS — UNDER A MINUTE

1 · Scan or tap

A QR on the table or a link in bio. Opens instantly — nothing to download or install.

2 · Browse the menu

Photos, best-sellers and offers — in English or العربية, whichever they prefer.

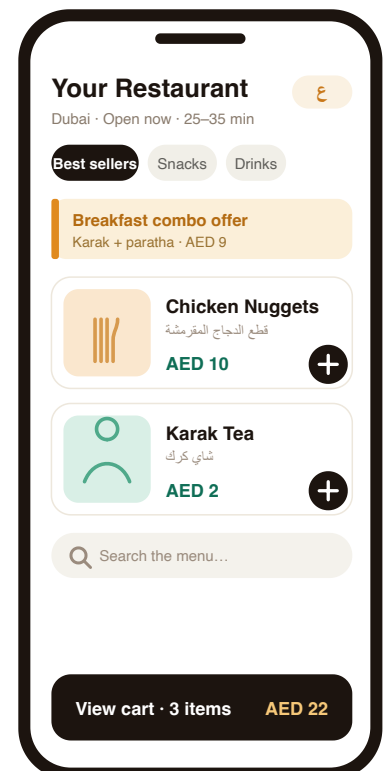

3 · Send on WhatsApp

The order lands in your WhatsApp and on your dashboard — fully priced and ready to cook.

NO PRINTED MENUS TO REPRINT · NO COMMISSIONS · YOUR CUSTOMERS, YOUR DATA

WhatsOrder replaces the messy mix of paper menus, screenshot orders and a notebook of phone numbers with **one link and one dashboard** — set up by AI in a day.

One platform. Your storefront, kitchen and back office.

Every feature below is live in the product today.

A storefront customers love

- QR & link ordering — installable web app, no app store
- Fully bilingual menu — English + Arabic, right-to-left
- Rich menu with photos, best-sellers & instant search
- Offers carousel — promote items at a special price
- Delivery, takeaway, curbside pickup & dine-in
- Reviews & ratings that build your reputation

AI that does the heavy lifting

- AI menu builder — snap a photo or PDF, get a full digital menu
- One-tap English → Arabic translation
- Auto-written, appetizing item descriptions
- Photos auto-optimized — menus load fast on any data plan

Set up in a day: send a photo of your current menu — AI does the typing.

Command your floor

- Live order board — New → Preparing → Completed
- Instant new-order alerts — nothing slips through
- One-tap kitchen tickets (KOT) & customer receipts
- Staff order entry for walk-ins & phone orders
- Smart status flow tailored to each order type

Know your business

- Sales, product, payment & fulfilment reports — export to CSV
- Customer CRM — VIP, repeat, new & inactive segments
- Insights: average spend, favourite items, last order
- Shift & cash reconciliation — expected vs counted

Built for the UAE

- Delivery zones by distance — only take orders you can serve
- Cash or card on delivery
- Customer privacy & consent, PDPL-aligned
- Opening hours — auto-pause when you're closed
- Team roles — owner, manager & staff access
- Delivery fees & minimum order, set your way (AED)

WHY OWNERS SWITCH

Built to grow revenue and kill the chaos.

Bigger baskets

Offers, best-sellers and mouth-watering photos quietly lift every order's value.

Fewer mistakes

Clear tickets and printed KOTs replace misheard phone orders and lost paper chits.

More repeat orders

Know your regulars by segment — VIP, repeat, inactive — and bring them back.

Hours saved every week

AI setup and one dashboard replace menu retyping, manual tallies and scattered tools.

ORDER TYPES YOU CAN SWITCH ON

Delivery

Address, area & landmark, with delivery-radius control.

Takeaway

Pickup orders, priced and queued in the kitchen.

Curbside pickup

Captures car plate & description for fast handoff.

Dine-in

Table-number orders sent straight to the kitchen.

Live on your menu in a day

Send us your current menu — we'll set the rest up with AI, ready in a day.
